this essential book discusses what reading for pleasure is and what it is not introducing some fundamental ideas about how we learn to read and how this process

can impact a child's identity as a reader in classrooms that promote equality, inclusion and diversity. The profile and importance of reading for pleasure has grown significantly over the last few years and is now firmly embedded in both government policy and the Ofsted framework. Developing a reading for pleasure school that is truly inclusive of the whole school community, however, can require a culture shift in relation to the teaching of reading, representation in the reading environment and the knowledge and attitudes of the school community. This book seeks to use the current research, teacher case studies and the voices of children to address some of the issues that teachers and pre-service teachers encounter when trying to develop an inclusive reading for pleasure culture within their schools. Each chapter is co-authored by teachers and researchers and includes case studies and children's perspectives. It provides practical and evidence-based advice, lesson ideas and creative ideas to both support and challenge all school leaders, staff and student teachers in their journey to create readers rather than children that can just read.

This engaging text offers primary school educators a principled way forward on their mission to nurture the life-changing habit of reading in childhood. Informed and inspiring, reading teachers accessibly demonstrate how teachers who are motivated, engaged and reflective readers themselves can develop new understandings of reading for pleasure and make a difference to young learners. Drawing on a range of research evidence, including studies on reading teachers, disengaged boy readers, student teachers as readers and work with over 150 schools developing communities of readers, this book provides an accessible overview of international research alongside a highly practical classroom focus. Combining the insights of academics with 24 reading teachers in co-authored chapters, the book includes case studies of how practitioners have used research to inform and improve their practice in conversation, dialogues between educators about classroom practice that fosters positive reader identities, reflections on the editors' own reading habits, practices and histories, recommended reading and suggestions of engaging children's books. Reading teachers nurturing reading for pleasure enables practitioners to develop principled practice, helping all children find pleasure and purpose in reading. This book is therefore essential reading for all primary teachers, head teachers, literacy coordinators and trainee teachers.

Of interest in their own terms as a significant cultural practice, reading groups also provide a window on the everyday interpretation of literary texts. While reading is often considered a solitary process, reading groups constitute a form of social reading where interpretations are produced and displayed in discourse. The discourse of reading groups is a study of such joint conceptual activity and how this is necessarily embedded in interpersonal activity and the production of reader identities. Uniquely in this context, it draws on and seeks to integrate ideas from both cognitive and social linguistics. The book will be of interest to scholars in literacy studies as well as cultural and literary studies, the history of reading, applied linguistics and sociolinguistics, digital technologies and educational research.
